ABOUT ME

Motivated Undergraduate Trainee Software Engineer with hands-on experience in backend development and cloud-based environments. Skilled in Java, OOP, design patterns, and building scalable applications with REST APIs and database design principles. Experienced with CI/CD concepts, Docker, Kubernetes, Linux, and infrastructure automation using Terraform and Chef. Familiar with version control and automated testing fundamentals. Eager to contribute to enterprise backend systems while growing expertise in scalable, cloud-ready software engineering.

WORK EXPERIENCE

Undergraduate Trainee Software Engineer **May 2025 - Present**
IFS R&D International (Pvt) Ltd

- Worked in Cloud Infrastructure team supporting Apps10, IFS Cloud, and IFS Remote environments across development and testing stages.
- Assisted in cloud deployments, configuration management, and environment setup for scalable and stable systems.
- Utilized Linux, Bash/Shell scripting, Docker, and Kubernetes for system administration and containerized deployments.
- Supported infrastructure automation using Terraform and Chef to improve deployment consistency and reduce manual effort.
- Performed troubleshooting, monitoring, and root-cause analysis for deployment and configuration-related issues.
- Collaborated with development, QA, and platform teams using version control and CI/CD workflows to support continuous integration and delivery.

EDUCATION

Bsc.(Hons) in Computing **Reading**
Coventry University, UK

- Specialization in Software Engineering.

Higher National Diploma in Software Engineering **May 2024 - May 2025**
National Institute of Business Management **GPA - 3.8**

Diploma in Software Engineering **Mar 2023 - Apr 2024**
National Institute of Business Management **GPA - 3.9**

Diploma in English Language & Literature
Aquinas College of Higher Studies

PROJECTS

Smart Donation Mobile Application (Individual)
https://github.com/Grandeur77/DonateMe.git

Android app that connects donors and recipients for food, clothes, and essential item donations. Supports location tracking via Google Maps API and real-time data using Firebase.

- Tech Stack: Java (Android), Firebase Realtime Database, Google Maps, Android Studio

Educational Institute Management System (Group)
https://github.com/Grandeur77/Educational-Institute-Management-System.git

A full-stack application designed to manage core operations of an educational institute. This system streamlines administrative tasks and enhances institutional efficiency.

- Tech Stack: C# (Windows Forms), SQL Server, Visual Studio, .NET

Online Freelancing Web Application (Group)
https://github.com/Grandeur77/WorkWave-Online-Shopping.git

A freelance service marketplace that connects clients with skilled freelancers for digital service exchange. It features secure transactions, and real-time info making it easy to buy or sell services.

- Tech Stack: React, Java (Spring Boot), MySQL, IntelliJ IDEA

Laundry Management System (Group)
https://github.com/Grandeur77/Laundry-Management-System.git

A web-based application for managing laundry services, including customer, order, service, and inventory management. Features an admin dashboard for centralized control.

- Tech Stack: Java Servlets, JSP, MySQL, TailwindCSS, Maven

Travel Planner Tool (Individual)
https://github.com/Grandeur77/Travel-Planner-Tool.git

A desktop application that helps users plan trips by managing destinations, budgets, and itineraries. Supports user registration, travel tracking, and cost estimation.

- Tech Stack: Java (Swing), MySQL, NetBeans IDE

Smart Cradle System (Group)

IoT-based infant monitoring solution with features like auto swinging, wet and temperature detection and night light control. Integrated with a real-time Android app using Firebase for remote monitoring.

- Tech Stack: Java (Android), Firebase Realtime Database, Google Authentication, Android Studio

---

TECHNICAL SKILLS

- Java
- Springboot
- React
- Node JS
- REST API development
- C#
- Azure
- Docker
- Kubernetes
- Terraform
- Linux
- Bash/Shell scripting
- MySQL
- Oracle
- MongoDB
- GitHub
- GitLab

SOFT SKILLS

- Adaptability
- Communication
- Time Management
- Problem Solving
- Analytical Thinking
- Continuous Learning
- Team Work
- Creativity
- Leadership
- Flexibility
- Continuous Learning
- Team Work
- Creativity
- Leadership
- Flexibility

COMPETITIONS

AWARDED

- HackElite 1.0 by UOM (Champions)
- J'pura Xtream by UOJ (Finalists)

PARTICIPATED

- MoraXtreme 9.0 by UOM
- CodeRally 5.0 by UOJ

CERTIFICATES

- Database Design Learner Oracle
- Database Foundations Oracle
- POSTMAN API Fundamentals
- Python for Beginners - Microsoft

COMMUNITIES

- IEEE Student Branch of NIBM Member
- Computer Society in NIBM Member
- Women Techmakers Member
